

23. The system of claim 22 wherein the album data structure comprises duration data specifying a display time for each content page contained therein.

24. The system of claim 22 wherein the content pages are distributed from the album data structure over the transmission system in a cyclical order.

25. The system of claim 22 wherein the content pages are distributed from the album data structure over the transmission system in a random order.

26. The system of claim 22 comprising:

a¹
a capture engine for capturing the content from the one or more locations specified in the set of templates; and

a display engine for transforming the captured content from each of the locations in accordance with the one or more transformation techniques specified in the set of templates and for inserting the transformed content into the templates to thereby create the one or more content pages.

27. The system of claim 22 comprising a transmission system for distributing the content pages to viewers.

28. The system of claim 27 wherein the transmission system comprises a transmission system selected from one or more of the group comprising: over-the-air television transmission, cable television transmission, DBS transmission and the Internet.

REMARKS

In the Office Action, the Examiner has rejected pending claims 1 through 21. Specifically, claims 1, 5 through 11, 14 through 16, 19 and 20 stand rejected under 35 USC 102(b) as anticipated by U.S. Patent No. 5,802,299 to Logan, et al. ("Logan"). Claims 2, 12, 13, 17 and 21 stand rejected under 35 USC 103(a) as obvious over a variety
